# INDEX OF ABSTRACTS
## Volume 23 (1976)

ABATZOGLOU, Theagenis. On the minimum norm projection on $L^p[0,2]$ and applications, A-137.
ABDELKADER, Mostafa A. Lotka-Volterra equations with time-varying coefficients, A-286.
ABDUL RAHIMAN, P. M. See AHMAD, Z. U.
ABELES, Francine. On simplical volumes. Preliminary report, A-385.
ABIAN, Alexander. Inducive Boolean rings, A-289; On a useful economy in the formation of Riemann sums, A-319; Conditionally complete and conditionally orthogonally complete rings, A-430; Inducive Boolean algebras and special prime ideals, A-514; A second uniform structure for topological spaces, A-602.
ABO-ZEID, Elsayed A. On $\sigma$-connected spaces, A-541.
ABRAMSON, Fred G. and HARRINGTON, Leo A. Models without indiscernibles, A-504.
ACKER, Andrew F. Heat flow inequalities with applications to heat flow optimization problems, A-585; A free boundary optimization problem, A-645.
ADAMS, J. Frank. Maps between classifying spaces, A-543.
ADAMS, M. E. and SICHLER, J. Free products of hopfian lattices, A-422; Endomorphism monoids of bounded lattices, A-473.
ADAMSON, Alan. On the structures A(M). Preliminary report, A-18.
ADDIS, David F. and GRESHAM, John H. A class of infinite-dimensional spaces. Part I: dimension theory and Alexandroff's problem, A-178.
ADEBOYE, Adeniran. On the spectrum of the Laplacian on spherical space forms, A-175.
ADU, David I. The partially ordered family of CM-homomorphisms of semigroups of closed binary relations. Preliminary report, A-85.
AHERN, Patrick. The isometric dilation of a multiplication operator. Preliminary report, A-664.
---. See RAO, N. V.
AHMAD, Shair. On nonselfadjoint linear homogeneous systems, A-487.
AHMAD, Shair and LAZER, A. C. Separation and comparison, A-647.
AHMAD, Z. U. and ABDUL RAHIMAN, P. M. Tauberian theorems for $|J, p_n|$-summability, A-487.
AJMAL, Naseem. Intertwined groupoids and quasigroups. Preliminary report, A-272.
ALAGIA, H. R. and SÁNCHEZ, C. U. Spin-structures on pseudoriemannian manifolds, A-593.
ALAS, O. T. On Blumberg's theorem. Preliminary report, A-23.
ALAVI, Y., BEHZAD, M. and NORDHAUS, E. A. The total connectivity of a graph, A-39.
ALEXANDER, Ralph. Linearly additive plane metrics. Preliminary report, A-446; A new approach to Hilbert's fourth problem. Preliminary report, A-593.
ALEXANDERSON, G. L. and WETZEL, John E. Some combinatorial formulas extending theorems of Steiner and Roberts on arrangements in $E^d$. Preliminary report, A-539.
ALI, Mir M. Behavior of "Student's" ratio under nonstandard situations, A-668.
ALIPRANTIS, C. D. and BURKINSHAW, O. On the completeness of locally solid Riesz spaces, A-151.
ALLARD, W. K. and ALMGREN, F. J., Jr. The structure of stationary one-dimensional varifolds with positive density. Preliminary report, A-171.
ALLAWAY, William Roy. Extensions of Appell polynomial sets. Preliminary report, A-115.
ALLEN, Allen D. A topological approach to the four-color problem, A-463.
ALLEN, H. P. and FERRAR, J. C. Weighted incidence coalgebra, A-350.
ALMGREN, F. J., Jr. See ALLARD, W. K.
ALO, Richard. See de Korvin, Andre.
ALSPACH, Dale E. and BENYAMINI, Yoav. On the primariness of spaces of continuous functions on ordinals. Preliminary report, A-153.
ALSTER, K. and ZENOR, P. An example concerning the preservation of the Lindelöf property in product space, A-600.
AMADIO, William J. The integral in a Boolean algebra: some applications, A-374.
AMITSUR, S. A. Applications of an identity, A-71.
AMITSUR, S. A. and SALTMAN, D. Generic abelian crossed products and p-algebras, A-577.
AN, Chung Ming and STEIN, Alan H. The asymptotic behaviour of zeta functions associated to positive definite forms with integer coefficients. Preliminary report, A-515.
ANANTHARAMAN, R. and WHITFIELD, J. H. M. Smoothability Banach spaces. Preliminary report, A-535.
ANCEL, Fredric D. and CANNON, J. W. Any embedding of $S^{n-1}$ in $S^n (n \geq 5)$ can be approximated by locally flat embeddings, A-308.
ANDERSON, Bruce A. Howell designs of type $H(P-1, p+1)$, A-673.
ANDERSON, Bruce A. and GROSS, Kenneth B. Starter-adder methods in the construction of Howell designs, A-576.
ANDERSON, D. D. Multiplication ideals, multiplication rings and the ring R(X), A-300.
ANDERSON, Gerald A. Higher Whitehead torsion, A-295.
ANDERSON, J. M. and RUBEL, Lee A. Hypernormal meromorphic functions. Preliminary report, A-321.
ANDERSON, James A. Characters of commutative semigroups, A-83.
ANDERSON, Robert M. Nonstandard measure theory in economics. Preliminary report, A-222; Weak convergence of conditioned random walks. Preliminary report, A-550.
ANDERSON, William and TRAPP, George. Algebraic properties of networks on matroids, A-69.
ANDERSON, William N., Jr. Analytic operator functions and electrical networks, A-657.
ANDREWS, George E. Computer searches for Rogers-Ramanujan type identities. Preliminary report, A-314.
ANDREWS, George E. and ASKEY, Richard. Survey of q-orthogonal polynomials. Preliminary report, A-527.
ANGEVINE, Roger L. Expansion of certain matrix functions. Preliminary report, A-137.
ANTMAN, Stuart S. Constructive methods for the equations of nonlinear elastostatics, A-131.
ANTON, Howard. Separation axioms and metric-like functions. Preliminary report, A-186.
APPLING, William D. L. Mean integrals and continuity, A-278; A nonintegrable Bochner-Radon-Nikodym theorem for the Lipschitz case, A-363; Upper and lower distribution functions, A-437.
ARCHER, D. A. and DIAZ, J. C. Modified collocation methods for two point boundary value problems, A-330.
ARKIN, Joseph. New observations on "Fermat's Last Theorem", A-515.
ARKIN, Joseph and SMITH, Paul. Reversed digit orthogonality, A-371.
ARMS, Judith M. Linearization stability of the coupled Einstein-Maxwell equations. Preliminary report, A-590.
ARMSTRONG, Thomas. Multiply harmonic presheaves and product sweeping systems. Preliminary report, A-319.
ARNOLD, D. M., O'BRIEN, B. and REID, J. D. Torsion free abelian q.p.i. and q.p.p. groups. Preliminary report, A-91.
ARNOLD, J. T. and BOYD, D. W. Transcendence degree in power series rings. Preliminary report, A-299.
ARONSZAJN, Nachman. General Cauchy formulas in $\mathbb{C}^n$, A-207.
ARSCOTT, Felix M. Higher special functions and boundary

value problems, A-110.
ARSOVE, Maynard and LEUTWILER, Heinz. Lattice-theoretic methods in axiomatic potential theory, A-322.
ASCHBACHER, Michael. Determining the finite simple groups, A-522.
ASH, J. M., JONES, R. L., ASH, P. and FEFFERMAN, C. L. Approximating the Hilbert transforms. Preliminary report, A-140.
ASH, P. See ASH, J. M.
ASIMOV, Daniel. Average Gaussian curvature of leaves of foliations. Preliminary report, A-493.
ASKEY, Richard A. Historical comments on the development of special functions, A-108; Inequalities between rearrangements with side conditions. Preliminary report, A-312.
ASKEY, Richard. See ANDREWS, George E.
ASKEY, Richard and ISMAIL, Mourad E. H. Permutations and special functions, A-109; Quadratic transformations of hypergeometric series, A-527.
ASNER, B. A., Jr. and BERNFELD, S. R. On the degeneracy of retarded and neutral differential equations in Hilbert spaces. Preliminary report, A-121.
ASSMUS, E. F., Jr. and MATTSON, H. F., Jr. Block designs, A-313.
ATALLA, Robert E. On the measure-theoretic behavior of closed sets. Preliminary report, A-500.
AUERBACH, Bruce and LASKAR, Renu. Equitable coloring of complete r-partite graphs, A-658.
AULL, Charles E. Functionally regular closed extensions. Preliminary report, A-178; Notes on Z-embedding. Preliminary report, A-542; On Z and Z* spaces. Preliminary report, A-672.
AULT, Janet E. Certain congruences on orthodox semigroups, A-85.
AUMANN, Robert J. Some game models in economics, A-407.
AUSPITZ, Norman. Q-sheaves and Q-fields of Banach spaces, A-373.
AXLER, Sheldon. $L^\infty = (H^\infty + C) \div \{\text{Blaschke products}\}$, A-536.
AXLER, Sheldon, CHANG, Sun-Yung A., and SARASON, Donald. Products of Toeplitz operators. Preliminary report, A-663.
BABUŠKA, I. and OSBORN, J. Approximation of eigenvalues of problems with rough coefficients. Preliminary report, A-683.
BACHELIS, Gregory F. and BARNES, Bruce A. Closed subalgebras of group algebras of a compact group, A-489.
BACHMUTH, S. and MOCHIZUKI, H. Y. Triples of $2 \times 2$ matrices which generate free groups, A-86.
BACKHOUSE, Nigel. Symmetrised Kronecker powers of representations of semisimple Lie algebras, A-81.
BAGGETT, Larry. A characterization of Heisenberg groups; when is a particle free? A-458.
BAILEY, Paul B. and NORRIS, Michael J. On the interval of existence of nonlinear two point boundary value problems, A-675.
BAIRD, Bridget. Congruences on the inverse semigroup $J_G(X)$. Preliminary report, A-85.
BAJPAI, S. K. and SHAH, S. M. Approximation and interpolation of entire functions and generalized orders, A-136.
BAKER, C. W. A closed graph theorem for Banach bundles. Preliminary report, A-159.
BAKER, Daniel. Characteristic classes for foliations. Preliminary report, A-295.
BAKER, John M. Weakly Cauchy sequences in tensor product spaces. Preliminary report, A-663.
BAKER, Kirby A. Congruence-valued logic in varieties of algebras. Preliminary report, A-391.
BALAKRISHNAN, V. K. Convolution-regular spaces of vector-valued distributions. Preliminary report, A-556.
BALBES, Raymond. On representable partially ordered sets. Preliminary report, A-474.
BALDWIN, John T. and BERMAN, Joel. A model theoretic approach to Malcev conditions, A-389.
BALL, B. J. Geometric topology and shape theory, A-310.
BALL, Joseph A. $C_{00}$ operator models on multiply-connected domains. Preliminary report, A-661.
BALLANTINE, C. S. Products of idempotent matrices, A-425.
BALLEW, David. Pythagorean triples and the sum of three squares, A-275.
BANASCHEWSKI, Bernhard. Relative subdirect representation in Horn classes of structures, A-44.
BANASCHEWSKI, Bernhard and NELSON, Evelyn. On the nonexistence of injective near-ring modules, A-8; Boolean powers as algebras of continuous functions, A-44.
BANCHOFF, Thomas F. Embedding surfaces in projective spaces. Preliminary report, A-611.
BANCHOFF, Thomas F. and McCRORY, Clint. Whitney duality and singularities of projections. Preliminary report, A-194.
BANGERT, Victor. A generalization of a theorem of A. D. Alexandrov, A-17.
BANKSTON, Paul. Some model theory for complete Boolean algebras, A-31; Topological ultraproducts and the GCH, A-457; On the number of Boolean algebras, A-494; Topological ultraproducts via good ultrafilters. Preliminary report, A-601.
BAREKET, Miriam. See RULF, Benjamin.
BARI, Ruth A. Chromatic equivalence and constrained polynomials. Preliminary report, A-511.
BARNES, Bruce A. The thin operators relative to an ideal in a von Neumann algebra, A-393.
BARNES, Bruce A. See BACHEUS, Gregory F.
BARNES, Ronald F. Handbook of statistical packages and other computer programs in statistics, A-604.
BARR, Richard S., GLOVER, Fred and KLINGMAN, Darwin. A new mathematical resolution of degeneracy in semi-assignment networks with application to large (real world) problems, A-221.
BARWISE, Jon and MAKKAI, Michael. The completeness theorem for stationary logic. Preliminary report, A-594.
BASENER, Richard. Peak points and strictly pseudo-convex boundary points. Preliminary report, A-11.
BASS, Hyman. Projective $\mathbb{C}G$-modules, A-78.
BATTERSON, Steve. Structurally stable complex Grassman transformation. Preliminary report, A-198.
BAXLEY, J. V. Global existence in initial value problems, A-125.
BEARD, Jacob T. B., Jr. Unitary perfect polynomials over GF(q), A-53.
BEARD, Jacob T. B., Jr. and WEST, KAREN I. Non-splitting unitary perfect polynomials over GF(p). Preliminary report, A-659.
BECHTELL, H. Inseparable finite solvable groups, A-84.
BECK, Robert E., KOLMAN, Bernard and STEWART, Ian N. Computing the structure of a Lie algebra, A-81.
BEDFORD, Eric and TAYLOR, B. A. The Dirichlet problem for a complex Monge-Ampere equation. Preliminary report, A-107; Variational properties of the complex Monge-Ampere equation. Preliminary report, A-614.
BEEM, John K. Globally hyperbolic spacetimes which are timelike Cauchy complete, A-219; Some examples of incomplete spacetimes, A-554.
BEEM, R. Paul. Generators of G bordism, A-295.
BEERS, Brian Lee and MILLMAN, Richard S. Spectra of the Laplace-Beltrami operator on compact semisimple Lie groups. II, A-174; Spectra of Laplacian on differential forms for Lie groups. Preliminary report, A-616.
BEERS, Donna L. The isomorphism problem for infinite abelian groups rings, A-605.
BEESON, Michael and TROMBA, Anthony J. The cusp catastrophy of Thom in the bifurcation of minimal surfaces. Preliminary report, A-618.
BEHZAD, M. See ALAVI, Y.

Henry O. Pollak, 160
Alice T. Schafer, 353

INVITED SPEAKERS AT AMS MEETINGS, 69, 104, 141, 200, 258, 311, 401

LETTERS TO THE EDITOR, 77, 127, 173, 214, 270, 362, 405
Lars V. Ahlfors, et al., 216
Anatole Beck, 214
Lipman Bers, 214, 216
R. P. Boas, 173
George A. W. Boehm, 127
R. C. Buck, 405
Bulletin Editorial Committee, 270
Kim Ki-Hang Butler, 214
John B. Conway, 79
Chandler Davis, 77
Rodney D. Driver, 214
Ed Dubinsky, 77
Syed M. Fakhruddin, 405
David H. Frisch, et al., 127
Christopher J. Henrich, 78
Melvin Henriksen, 362
Robert Hermann, 270
Roger A. Horn, 407
Richard Isaac, 405
Shmuel Kantorovitz, 79
J. J. Kohn, 215
Ignacy I. Kotlarski, 214
E. Mendelsohn, 215
Stephen Meskin, 128
George J. Minty, 214
Albert A. Mullin, 173
G. J. Porter, 127
Bertram Ross, 406
Hugo Rossi, 78
H. Stephen E. Schloss, 215
Hans Schneider, 406
Laurent Schwartz, 78
Michael Shaskevich, 127
Lynn Arthur Steen, 128
William A. Veech, 362
Scott W. Williams, 128

MEETINGS OF THE AMS
Abstracts Presented at Meetings of the Society, A-24, A-297, A-370, A-458, A-502, A-605, A-654
Calendars of Meetings, Inside Front Cover
Preliminary Announcements

| | |
|---|---|
| March: | Tallahassee, Florida, 64 |
| | Urbana, Illinois, 66 |
| April: | New York, New York, 105 |
| | Reno, Nevada, 69, 107 |
| June: | Portland, Oregon, 108, 147 |
| August: | Toronto, Canada, 148, 187 |

Preliminary Announcements (cont.)
October: Storrs, Connecticut, 254
November: Ann Arbor, Michigan, 200, 255
Columbia, South Carolina, 256, 292
Albuquerque, New Mexico, 257, 293
January: St. Louis, Missouri, 294, 383
Programs of Meetings
January: San Antonio, Texas, 2
March: Tallahassee, Florida, 90
Urbana, Illinois, 96
April: New York, New York, 134
Reno, Nevada, 142
June: Portland, Oregon, 184
August: Toronto, Canada, 226
October: Storrs, Connecticut, 286
November: Ann Arbor, Michigan, 289
Columbia, South Carolina, 372
Albuquerque, New Mexico, 378
Short Course
On Mathematical Aspects of Production and Distribution of Energy, San Antonio, 3
On Introduction to Computer Science for Mathematicians, New York, 68, 105
On Mathematical Economics, Toronto, 149, 188, 227
On Statistics, St. Louis, 295, 384
Abstracts
New York, A-333
Toronto, A-405
St. Louis, A-619

NEW AMS PUBLICATIONS, 76, 132, 175, 210, 267, 363

NEWS ITEMS AND ANNOUNCEMENTS, 72, 113, 129, 172, 216, 262, 367, 411

ORGANIZERS AND TOPICS OF SPECIAL SESSIONS, 71, 104, 141, 199, 258, 309, 401

PERSONAL ITEMS, 70, 132, 177, 201, 271, 361, 407

QUERIES, 80, 125, 182, 223, 278, 365, 410

RESERVATION AND PREREGISTRATION FORMS, A-264, A-348, A-417, A-418, A-471, A-472, A-634, A-637, A-699

SALARY SURVEY, Twentieth Annual, 313

SEMINARS AND INSTITUTES
1976 Summer Research Institute on Algebraic and Geometric Topology, 68, 108
Final Report on 1976 Summer Research Institute, 310
1977 Summer Institute on Automorphic Forms, Representations, and L-Functions, 308, 400

SITUATIONS WANTED, A-230, A-336, A-409, A-464, A-558, A-624, A-688

SPECIAL MEETINGS INFORMATION CENTER, 82, 119, 178, 219, 274, 343, 408

SPECIAL SESSIONS, ORGANIZERS AND TOPICS, 71, 104, 141, 199, 258, 309, 401

SYMPOSIA
Symposium on Some Mathematical Questions in Biology, Boston, Massachusetts, 63
Symposium on Probability, Urbana, Illinois, 66, 96
Symposium on Asymptotic Methods and Singular Perturbations, New York, 67
Symposium on Some Mathematical Questions in Biology, Denver, Colorado, 307, 399

SUMMER GRADUATE COURSES, 115
Supplementary List, 171

VISITING MATHEMATICIANS, 358
Supplementary List, 88, 124, 404

1977 MATHEMATICAL SCIENCES administrative directory

- HEADS OF ACADEMIC DEPARTMENTS IN THE MATHEMATICAL SCIENCES IN THE U.S., CANADA, CENTRAL AMERICA AND THE CARRIBBEAN, CODED ACCORDING TO THE HIGHEST DEGREE OFFERED;
- HEADS OF NONACADEMIC RESEARCH GROUPS;
- HEADS AND KEY PERSONNEL OF A SELECTED GROUP OF GOVERNMENT AGENCIES;
- EDITORS OF MATHEMATICS JOURNALS;
- OFFICERS AND COMMITTEE MEMBERS IN OVER TWENTY PROFESSIONAL MATHEMATICAL ORGANIZATIONS;
- AN INDEX OF DEPARTMENTS IN THE MATHEMATICAL SCIENCES.

Publication Date:
April 30, 1977
List Price $5.00
Member Price $2.50
Code: ADMDIR/77
Prepayment Required
